APPLIANCE TECHNICAL TRAINING

Our school offers a very comprehensive and diverse technical training program that will give you the beginning foundation that you need to efficiently repair appliances.

At Fred's Appliance University students will experience hands on classroom instruction by an instructor with over 30 years experience in the appliance repair industry. The class will start with basic electrical circuitry and schematic training followed by laundry, kitchen, and refrigeration. A variety of makes and models will be introduced to the students allowing for a very complete education on appliance repair. The course will then be wrapped up with a NAS-TeC (National Appliance Service Technician Certification) exam.

- Hands-on Repairs on Many Different Makes/ Models
- Basic Electricity
- Live Tech Rides
- Customer Service/Soft Skills
- Schematics
- Troubleshooting
- Brazing/Soldering
- NASTeC Certification

Fred's Appliance University has developed a very complete and comprehensive technical training program focused on servicing all major appliances. The course is not just simply made up of technical training. It covers many facets of service including customer service skills and live tech rides. Additionally, each student will have access to a computer to learn how to harness the internet to obtain useful technical information directly from many manufacturer websites along with looking up parts.

...a superior and complete solution for appliance repair training..

Certification

Once the 3 week course is complete, each student will take the NASTeC (National Appliance Service Technician Certification) exam. This exam is recognized nationally. The exam fee is included in the course fee. Also, if desired, students will be offered the opportunity to take a Class one CFC certification for a nominal fee.

Instructor Credentials

Fred Butcher has over 30 years in servicing appliances. He is currently an owner of Fred's Appliance, LLC, a successful service company in the greater Cleveland, OH area. He holds NASTeC certification along with CFC certification. Additionally, he has been a contracted instructor at an area community college for appliance technical training that holds an outstanding success rate.
